PROFESSIONAL SUMMARY

Certified Network Engineer with proven ownership of service providers and enterprise networking, security, and high-availability operations across fintech, financial-institution, Operational Technologies, and service-provider environments. Delivered SD-WAN across 150+ financial-institution branches; owned Infrastructure and firewall security for a regulated payments platform, supported core network operations and high-risk data-centre integrations for tier-one banks. Combines deep routing/switching and firewall expertise with monitoring, incident response, documentation, and vendor coordination.

EDUCATION

M.S. Electrical and Computer Engineering, Carnegie Mellon University | 3.63/4.0 CGPA

B.Eng. Telecommunications Engineering, Federal University of Technology Minna, Nigeria | 4.2/5.0 CGPA

TECHNICAL EXPERTISE

Routing & switching: TCP/IP; LAN/WAN architecture; VLANs; OSPF; EIGRP; BGP / iBGP; MPLS; SD-WAN; QoS; DNS/DHCP services; wireless controllers; Cisco and Huawei enterprise networking

Security & access: FortiGate (policy, logging, segmentation, least privilege); FortiAuthenticator; IPSEC VPN (remote-access & site-to-site); pfSense & OpenVPN; NAC (Forescout); Azure AD / SSO / MFA; network segmentation

Availability & operations: SolarWinds; Grafana; Prometheus; Loki; Graylog; Suricata; alert triage; SLA-driven uptime (99.5%+); L2/L3 troubleshooting under outage pressure

Projects & delivery: Branch and DC implementations; change and cutover support; SOPs, diagrams, configuration documentation; vendor/partner coordination; hybrid cloud networking (Azure/AWS and on-prem)

PROFESSIONAL EXPERIENCE

Network Infrastructure and Security Engineer, Zone Payment Network (APPZONE GROUP) (Fintech / Payments), Lagos | April 2025 – Present

- Led network and security integrations between Zone and major banks and online financial institutions across Nigeria by taking connections from requirements and stakeholder alignment through staging/UAT to production cutover.
- Led cross-functional communication with bank IT/security teams, internal product/ops, and vendors by capturing requirements, documenting design/SOPs, and managing production changes with clear audit trails.
- Configured and managed Cisco routers and firewalls inside partner bank environments, alongside Fortinet platforms, to deliver secure, segmented connectivity that met each institution's security and compliance expectations.
- Designed and deployed underlay and overlay connectivity for secure bank/fintech interconnects, coordinated carrier/service-provider circuits, change windows, and handover.
- Owned end-to-end remote-access and site-to-site VPN services on FortiGate and FortiAuthenticator for policy, authentication, segmentation, least privilege, logging and supporting both internal users and external integration traffic.
- Drove network monitoring and incident response with SolarWinds and Grafana; restored services under pressure and sustained availability against 99.5%+ SLA targets.
- Applied OSPF and EIGRP alongside enterprise security controls to keep hybrid routing stable and supportable.

Network Engineer, Huawei Technologies Nigeria Limited, Lagos | January 2024 – June 2025

- Contribute to the delivery and support of Huawei SD-WAN across 150+ financial-institution branches which enabled centralized visibility, performance management, and high-availability operations.
- Configured and troubleshot enterprise LAN/WAN infrastructure including routers, core/access switches, VLANs, firewalls, and wireless controllers for Lagos Smart City Project sites.
- Implemented Network Access Control (NAC) with to harden network admission and reduce unauthorized access risk.
- Engineered multi-site routing using iBGP within SD-WAN designs and OSPF in site/WAN contexts for stable, scalable control planes.
- Executed high-pressure cutovers and project implementations with full documentation and third-party/vendor coordination.

IT Support & System Administrator | Summitech Computing Limited, Lagos | November 2022 – Dec 2023

- Delivered multi-site IT and network operations for Eye Foundation Hospitals across Nigeria and other healthcare clients and keeping clinical and administrative sites connected, secure, and supportable.
- Deployed and supported CCTV and wider surveillance systems across hospital branches, ensuring camera connectivity, recording availability, and day-to-day operational uptime for security teams.

Core Network Operations Engineer, IpNX Nigeria Limited, Lagos January 2022-November 2022

- Delivered data-centre support for corporate/tier-one clients, including high-risk integrations at MainOne MDXI, ADC, Medallion, and Rack Centre.

- Supported fibre and wireless deployments for corporate clients as both field engineer and back-office support — covering site surveys, implementation support, and post-deployment handover.
- Configured and supported FTTH (OLT/ONT), MPLS services, and core routing (OSPF/BGP) for enterprise and carrier connectivity.
- Contributed to link verification, handover documentation, and NOC/core engineering workflows under live operational conditions.

SELECTED ACHIEVEMENT AND CERTIFICATIONS

- First Prize, Huawei ICT Competition African Regional Finals & Global Finalist
- First Prize, SIGCOMM POD Hackathon (Carnegie Mellon University Africa).
- Mastercard Foundation Scholarship for Graduate Studies at Carnegie Mellon University
- Federal Government of Nigeria Scholarship award for Undergraduate studies
- Cisco Encor; Huawei HCIP (Advanced Routing & Switching; SD-WAN); Microsoft AZ-900 & SC-900.

TEACHING & LEADERSHIP EXPERIENCE

- Teaching Assistant for Wireless Networks and Applications (Prof. Peter Steenkiste, CMU, Spring 2026): led graduate office hours, guided assignment/lab troubleshooting across wireless and networking topics, and supported reliable course operations through clear technical instruction.
- President, Telecommunications Engineering Student Association (FUT Minna): led the departmental student body, set academic/professional programmes, coordinated executives and members, and represented Telecom students to faculty and industry stakeholders.
- Technical Teaching Assistant for CMU Africa Bridge Programme (IoT/ML, Summer 2026): mentored students in hands-on labs and projects, provided structured debugging support, and helped diverse learners convert concepts into working technical outcomes

CERTIFICATIONS

Cisco Encore · Huawei HCIP (Advanced Routing & Switching) · Huawei HCIP (SD-WAN) · Microsoft AZ-900 · Microsoft SC-900 (Security, Compliance & Identity)
